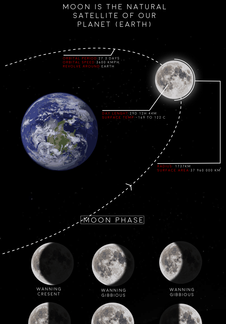
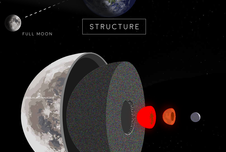
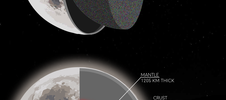
MOON IS THE NATURAL SATELLITE OF OUR PLANET (EARTH)

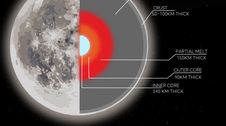


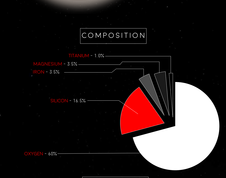
MOON PHASE



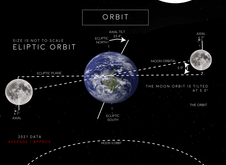


STRUCTURE

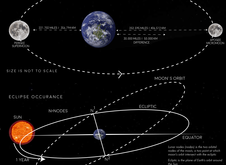


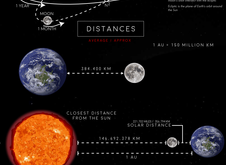


COMPOSITION



ORBIT





DISTANCES

AVERAGE • APPROX

1 AU = 150 MILLION KM

The Distance shown are the peak point distance as the moon revolves around the earth. On average, the distance between sun and moon is constantly changing.

During Solar eclipse it is the closest and during Sunset, it is the farthest from the sun.

THE MOON MOVES APPROXIMATELY **3 BCM AWAY** FROM EARTH

MOON

GRAVITY
1.62 m/s²

DENSITY
3.34g/cm³

MASS
7.35 X 1022 KG

MOON LANDINGT MELINE
